REASONS FOR ALLOWANCE

(1)

The following is an examiner's statement of reasons for allowance: The prior art of record, Kagawa et al. 5,648,107, discloses making a plurality of non-through pores in a region of a film using a first block or roll having diamond particles thereon (impresser) pressing into the film and a second block or roll having a surface having a protruding pattern (transfer) and discloses that for making non-through holes in another pattern, the second block or roll is replaced with one having another protruding pattern. The prior art of record does not disclose or suggest performing an impression step to form a plurality of protuberant structures, as described in the specification, on a region of a film using a squeezer including an impresser having a plurality of grain projections which form the protuberant structures formed thereon and a transfer and a template, the template having a pattern corresponding to the region of the film for forming the protuberant structures on the region of the film and placed between the film and the transfer.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
